THERMO-PAN® RETURN AIR PANNING

THERMO-PAN® is a high quality, sheet metal alternative for constructing return air ducts between joists and stud cavities. Consists of corrugated insulation faced with aluminum. Significantly reduces duct noises and labor.

- No shop fabrication; user friendly, no cut hands
- No 'oilcanning' or duct noises to generate contractor callback
- Air space in the corrugated medium provides positive R-value
- Stapling as directed results in a plenum air seal tighter than sheet metal
- Enviro-friendly; made from recycled products. Moisture treated against dampness
- Will not sustain combustion (ASTM E84-91a: Flame Spread 35/Smoke Developed Index 25)
- No duct noise
- Satisfied homeowners
- Excellent for open web trusses
- Lightweight
- Easy to install
- Four (4) precision pre-cut header sizes available

THERMO-PAN® PANNING CONNECTORS

Thermo-Connectors are molded plastic strips available in all sizes which easily connect THERMO-PAN® panels.
